Kretz´s AURA series is a brand new evolution in the medium store scales segment.
It reunites functional and technological features thought for daily duty and users' need.

Aura´s design makes her attractive. Her sturdiness and quality meet the parameters of all Kretz products. Its thermal printer allows you to print receipt tickets with barcode included, for a proper control at the check out point.

Our soft iTegra will give you the oportunity to get reports and statistics of operations by user, section or department.
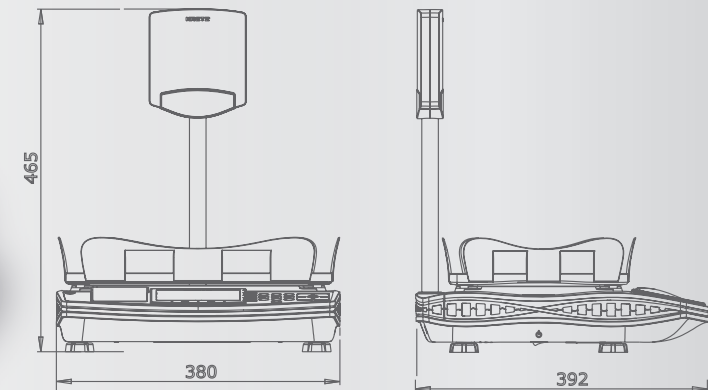

iTegra SOFTWARE

iTegra management software allows the integration of all Kretz interconectables solutions such as scales, cash registers or consumer price verifiers. It manages all the information related to transactions, controls multiple functions and gives reports, statistics and works with automation tasks.

It's developed 100% in Java language and includes communication driver JDataGate for data traffic with other softwares. It also works with several systems (Windows, Linux, Mac OS X, etc)
