CIPHERLAB CIPHERLAB CO., LTD.

New 8300, Ingenuity Engineered to Deliver Greater Performance
and Best ROI in the Modern Mobile World!

With the good reputation of CipherLab 8300 series launched since 2003, CipherLab is now introducing the new version with more enhanced features that enables more efficient data capture and communication in the highly competitive and harsh environment.

It's equipped with more data memory, bigger power capacity, the new & smarter main board with less power-consumption, upgraded reader performance, plus more choices of reader options. Best of all, all the improvements come at the original price!

Highlights of the new 8300 series* include:

- ✓ Increased data memory to 2MB SRAM on-board, options of additional 4MB and 8MB are also available
- ✓ Better LCD display and brighter LED backlight for easier reading regardless of dark or bright environment.
- ✓ Better notification with the vibrator to assure the data capturing even in noisy environment.
- ✓ Upgraded linear imager & laser reader that can read longer distance.
- ✓ More reader options: Long range laser (reading range up to 218cm) and RFID (13.56 MHz)
- ✓ Longer working hours with the bigger 3.7V 1800mAh Lithium-ion battery
- ✓ Unified case & main board across new 8300 series that simplifies logistic management and future maintenance & repairing.
- ✓ RoHS compliant

In addition to the original range, the new model 8330 with WiFi and Bluetooth (Class 2) is now available to meet the growing need on more than one communication.

The new version of 8300 series will be ready to take your orders soon. Detailed specifications are attached for reference. For more information, please contact our sales representative.

*The new 8300 series includes 8300, 8330, 8360, & 8370.
