

WIRELESS RESTAURANT SOLUTION

Restaurants Service Calling System

What is service calling system?

Service Calling System is a wireless system specially designed for the restaurant application, which Service Caller can work with Display independently without any extra device.

What does Service Calling System include?

2 options for Service Caller:	Desk type service caller	SC1W5
	Round shape service caller	SC2W5
3 options for Display:	Wall type big display	BD1W5
	Watch type display	WD1W5
	Waist pager type display	PD1W5
1 Signal Reinforcement Device:	RF repeater	RR1W5

How does it work?

- Customer initiates a calling through the service from SC1X or SC2X which be fixed on the table.
- Waiter/waitress receive the service demand on Watch (or BD1X, PD1X).
- By the No. shown on Watch, he/she will immediately get the service demand of customer, then provide prompt service.
- First 3 digits stands for table No., last digit stands for service code.
- 1.2.3. service code means WATER, CALL, BILL, respectively.
- Function key definition of SC1X and SC2X can be customized with MOQ order quantity.
