

Fashion

Wincor Nixdorf's hardware and software solutions support operations to create value in the store. The technology investment that you make will support long-term business growth.

Point-Of-Sales

Wincor Nixdorf's POS systems allow speedy transactions and the capture of customer data.

WnFashion Software

The user-friendliness of Wincor Nixdorf's WnFashion software reduces the need for service staff training. It also provides complete visibility of your business.

Central Management

Experience the convenience and control by managing multiple stores and POS systems all from one place with our central management module.

Know and Grow Your Business

What are your top selling products? Who are your best customers? How should you manage your workforce to cater to demand? WnFashion provides you with better visibility of your business and enables you to make better-informed decisions.

Build a Strong Customer Base

Your existing customers are your best asset! Keep your customers coming back and build a steady revenue stream with our customer loyalty module.

Customised In-Store Promotions

Start running in-store promotions from the list of default promotion settings or simply create new promotions.

Manage Your Inventory

Manage multiple brands, seasonal designs, hundreds of product lines and keep track of existing stock easily with our inventory module.

In-store Experience for Your Customers

Give your customers a totally different shopping experience as they interact with a digital shopping assistant, accessing instant information at their fingertips.

Sell to the World Round the Clock

Increase your customer base through the internet. Create your very own online store to sell to the world 24/7.
